

Testamonial from patient of Dr. Hecht

As a young girl I was always in the sun, no one used sunscreen if they didn't burn, at least I didn't - and I could tan.

Raised with little money and no mother, who really gets any "beauty" tips. I don't ever remember putting lotion or night creams on my face to keep it moisturized.

As a young wife, I just never thought much about it. Figured I looked like I did and there was not going to be much you could do. Again, always in the sun, could tan wonderfully. Sun screen - you have to be kidding!

Grandmother diagnosed with skin cancer. Sister not even able to be out in the sun, at the beach she is under hat and umbrella. Hmmmmmmm.

Large discoloration on the side of my face, don't remember when it was first noticed, just know as I got older it got a rougher surface and continued to expand out. Sister said go get it taken off, doctor said it was okay, not skin cancer. Just left it alone.

Went to the Obagi system when I had a visit with Dr. Hecht because of the growing brown spot on my face and the (for lack of a better word) lesions under my skin. They were almost like blind pimples, but worse. Just bumps all across my face.

Got home, started the Obagi system and was faithful. I do not know exactly how it all works, but it works. More than the dark brown spot nearly invisible now, the bumps and rough surface is totally smooth. The layers of skin that are shed with the product ends up removing the lesions I had.

I did see some before and after pictures. Definitely my skin has changed. The lady I work with in the office said "don't know what you did, but you took 10 years off your face." And, she is right. I just look so much better.

Okay. Now for me, with no money to spend on such things as a young girl, and then no interest as a young woman, I probably have saved money with this system. I don't put anything on my face anymore except what I have with the Obagi system, and I use the mineral cover - (sometimes don't need even that) - and that is all I use for skin care and makeup.

I think pictures are being included. I always wondered about testimonies and if people are paid to say stuff or just don't want to admit they spent a lot of money on something that does not work - so they say good things about it. Trust me, I don't say anything for anyone.....unless it is true. So why am I doing this. Because at 61, I took a chance and found out - my skin can look better. And believe me it does. So, if you were a "sun goddess" and never really took care of your skin, and maybe think its too late to do something, well - at 61 it was not too late for me.

So, try it. You really have nothing to lose - except dull, dry, old skin. You are spending your skin money on something - spend it on something that works.
